Who has
10?

Player 1 reads their first card. Example: "I have 10. who has 6?" The player that has the number that player one asks for goes next. Example: "I have 6. Who has 12?" Play continues until all cards are called.

Alternate game: Place 19 cards around the room. Give your child one card. Have him read the card out loud. Example: "I have 10. who has 6?" Have him find the card with the next number. Example: "I have 6. Who has 12?" Play continues until all cards are found.
